

Gateway

Designed by **MS Solutions**, **MSS Gateway** is a customizable, flexible payment gateway that meets the highest security standards.

It centralizes the processing of EPT transactions of all points of sale and provides real time visibility of operations through reporting on a web portal.

WHY CHOOSE MSS GATEWAY ?

Relocate EPT transaction processing and centralize it at the Gateway level

PROCESSING

MONITORING Provide the bank and its affiliated merchants with a real-time transaction monitoring interface

Configurability 
of the solution at central level to manage merchant accounts, shops, EPT, banks, hosts...

Upgradeability 
of the solution according to protocol choice to adapt with the host

Flexibility 
of the solution when a new protocol is used by the HOST

BENEFITS OF MSS GATEWAY

Loyalty

Stand out from other banks by offering your affiliates an additional service

Tracking

View reports and transaction statistics via a dedicated portal

Real-time

Instantly track all your transactions regardless of their status or origins

Independence

Monitor your transactions on your own payment gateway

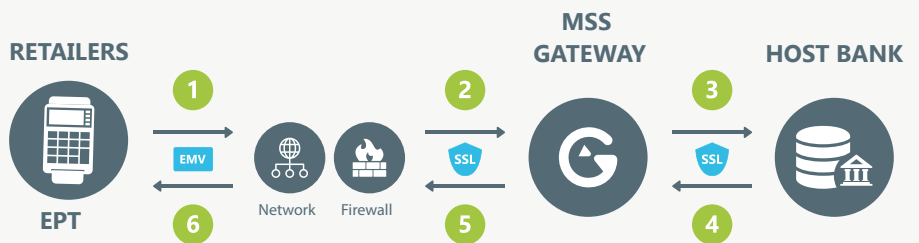

Easy Set-up

Save time, gain in autonomy and versatility in managing your accounts

MSS GATEWAY GLOBAL PROCESS AND DIAGRAM

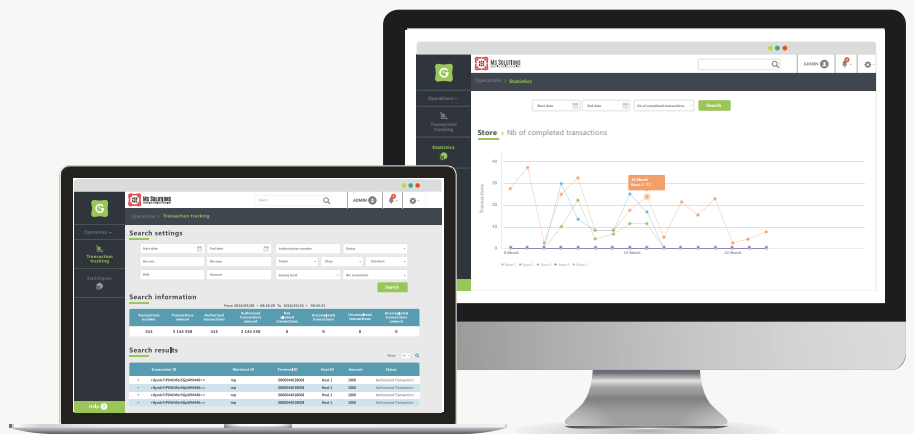

- 1 Sending transaction data to the Gateway
